

## ToolsUnited

brought to you by CIMSOURCE

Since 2018 ToolsUnited brings the No. 1 search engine and data source for cutting tools to the North American market. Backed by a team of US industry experts with backgrounds in cutting tool distribution, sales and machining technology and the German CIMSOURCE GmbH we are well equipped to service the manufacturing industry.

For the benefit of the tool consumers, ToolsUnited provides tool makers with managed services for content generation to

help them tackle the challenges of the digital transformation.

ToolsUnited cooperates with local distribution to cover the "final mile" of the information supply chain.

## Your tool to find the perfect tool.

### search.

Our advanced search technology makes it easy to find the exact tool you'll need for your machining application. Search by specifying the required tool properties, specific application, or tool's intended use.

### download.

Easily download a 3D digital twin of your tool for NC verification. You can download data and specifications for many different CAM systems and even export to industry standards such as ISO13399/GTC, DIN4000.
