

Unlock the Power of accurate Tool Data with ToolsUnited

USCTI 2025 Member Offer

Connect to end users for less than one printed magazine ad!

ToolsUnited isn't just a digital tooling database, it's a powerful platform that cutting tool manufacturers can use to enhance their brand, streamline their buying channels, and expand their market reach. By standardizing and publishing your cutting tool data in ToolsUnited, you ensure that thousands of CAM programmers, distributors, and manufacturing engineers can find, search and source your tools.

CIMSOURCE Offer:

- Onboard up to two product categories on ToolsUnited for a 1-time cost of \$5,500 (no recurring fees or payments).

With ToolsUnited, cutting tool manufacturers gain:

-  Greater visibility to end users actively searching for cutting solutions (~ 20% of market has replaced catalogs with digital tooling sources).
-  Consistent, high-quality digital data that has compatibility with 3D CAM, simulation and digital twin systems like Zoller
-  Stronger brand differentiation through enriched product content and standardized metadata
-  Faster product adoption, as users can directly integrate your tool data into their workflows without manual entry
-  Closer alignment with distributors and machine builders, all using the same clean, authorized data
-  Reduced support burden, thanks to accurate specs that eliminate misinterpretation, incorrect selection or simple data entry errors.

Publishing your tool catalog on ToolsUnited ensures your brand stays competitive, visible, and fully integrated into the digital manufacturing ecosystem, exactly where modern customers expect you to be.
